

## EVENT OVERVIEW

The Excellence in Research Gala was initiated to recognize outstanding achievements in health research and to show gratitude to the corporate community for its generous financial support.

The QEII Foundation is honoured to be highlighting the Department of Diagnostic Imaging at the QEII Health Sciences Centre.

Friday, November 5, 2010

Cunard Centre [Pier 23] Halifax, Nova Scotia

6:00 pm – Formal – Black Tie optional

Since its inception 12 years ago, *The QEII Excellence in Research Gala* has fortified strong relationships with many departments within the QEII Health Sciences Centre as well as organizations from the corporate community. These relationships have benefited both the patients of the QEII and the sponsoring organization. It is also a great opportunity to network with over 900 sponsors and guests, covering a wide range of areas including various departments within the QEII, pharmaceutical representatives, Capital Health executive, the corporate community, the QEII Foundation Board of Trustees and key community volunteers.

## 2010 SUPPORT

Since the discovery of the x-ray in 1895, the field of Diagnostic Imaging has become the keystone of diagnosis in modern medicine. It allows us to look inside the human body to identify and treat disease using a powerful array of modern technology, including computed tomography (CT), ultrasound, magnetic resonance imaging (MRI), mammography, nuclear medicine and interventional techniques. These powerful tools span virtually all areas of medicine (including cancer, heart and brain disease), providing an enormously beneficial impact on patient care.

Patients at the QEII interact with highly-trained, compassionate technologists and support staff as well as world-class physicians (radiologists). The Diagnostic Imaging Department is committed to providing the best in clinical care, and to advancing the field through a broad, multi-disciplinary research initiative.

We are excited about this opportunity to share our profession with you at the QEII Excellence in Research Gala!
